

Protect Your Most Valuable Gaming Assets with IT Vulnerability and Penetration Testing from **Bulletproof**[™] — a GLI[®] Company

Today's modern gaming enterprises throughout the Asia-Pacific region and the world are powered by technologies that are increasingly at risk of sophisticated attacks by cyber criminals. To protect your most valuable gaming assets, you need to test your internal and external IT systems for vulnerabilities that expose you to cyber-attacks.

BULLETPROOF'S VULNERABILITY AND PENETRATION TESTING PRICING

Vulnerability Testing (external only) \$11,000 USD*

Bulletproof's vulnerability testing uses proprietary software and an extensive database of known security vulnerabilities to identify weaknesses in a gaming organization's computer systems. The resulting report provides a detailed assessment that helps reduce risk and meet industry best practice standards. Bulletproof will work together with your organization to remediate any potential vulnerabilities that are identified.

Penetration Testing (external only) \$13,000 USD*

Penetration testing provides simulated real-world attacks on gaming computer systems to identify potential critical points of failure before these computer systems can be attacked and exploited. Bulletproof will work together with your organization to remediate any points of failure that are identified.

ONLINE AND LAND-BASED VULNERABILITY, PENETRATION TESTING, AND SECURITY ASSESSMENT BUNDLES

Bundle 1: Online Presence Review – Cost: \$16,000 USD*

- External Infrastructure Vulnerability Assessment: Identifies exploitable areas that could result in unauthorized access. (Includes 20 IPs)
- External Penetration Test: Validates any weaknesses identified by the external infrastructure vulnerability assessment. (Includes 20 IPs **excludes Web Applications**)
- Web Application Security Assessment: Identifies vulnerabilities and exploitable areas that could result in the loss of data and/or application compromises. (Includes one URL)

Bundle 2: Land-Based Casino Review – Cost: \$23,000 USD*

(+ travel time and expenses) Includes up to 1000 IPs total

- Internal Infrastructure Vulnerability Assessment: Identifies exploitable areas that could result in unauthorized access to internal infrastructure.
- Internal & External Penetration Test: Validates any weaknesses identified by the internal and/or external infrastructure vulnerability assessment.
- External Infrastructure Vulnerability Assessment: Identifies exploitable areas that could result in unauthorized access to external infrastructure.
- Wireless Network Assessment: A wireless assessment and penetration test that validates any weaknesses in the wireless infrastructure and its configuration.
