FULL LIFECYCLE COMPLIANCE

END-TO-END TESTING

TECHNICAL COMPLIANCE

REGULATORY COMPLIANCE

◀ Regulatory Compliance

We help you grow your business by providing unrivaled insight into new markets, products, and opportunities.

◀ Technical Compliance

We minimize risk and identify potential regulatory issues through our unparalleled knowledge of the industry, and assess your processes against best practice standards.

◀ End-to-End Testing

GLI's comprehensive testing suite and IT security services include pre-compliance, testing, inspection, audit and certification of your products.

◀ Full Lifecycle Compliance

We help you maintain and understand your ongoing compliance obligations.

Insight.
Innovation.
Growth.

Regulatory Compliance

Stay ahead of the competition by understanding what is on the horizon in the world of gaming with industry insights and information from our experts at GLI.

Regular reports and updates will give you all the business information you need to turn any threat into an opportunity and any opportunity into growth.

- Emerging Markets
- Existing Opportunities
- Regulatory Developments
- New Technologies
- Research and Development
- Corporate Responsibility
- Customised Regulatory Research

Technical Compliance

Our global experts are here to make sure you are ready for market and help you navigate the complex and varied technical requirements you need to meet. We help you minimise risk, identify potential regulatory issues and assess your processes against industry best practice standards.

**Educate.
Advise.
Strengthen.**

Technical Standards

Every jurisdiction has its own unique technical standards and navigating them can be a challenge. You can rely on GLI's vast library and experienced team to find what standards your product must meet.

Technical Analysis

GLI can conduct Gap Analyses between different jurisdictions to benchmark compliance of your product across several markets, highlighting new opportunities and minimising costs by reducing the need for product redevelopment or retesting.

Customised Technical Research

If you have a specific question, product or product feature, or want an overview of a particular subject matter, GLI can provide you with unique Technical Research tailored to your needs.

**Quality.
Integrity.
Compliance.**

End-to-End Testing

GLI's comprehensive testing suite and IT security services include:

Concept Compliance Review

Our experts are ready to review your product concepts even before they reach the production stage. By providing GLI with a conceptual description of your ideas, we can highlight possible incidents of non-compliance before the product enters production, saving on expensive redevelopment costs.

Pre-Compliance Testing

Our experienced engineers and mathematicians can work with developers to test products against technical requirements prior to being submitted to the lab for formal certification. Like Concept Compliance Review, the benefit of pre-compliance testing is to detect functional and compliance issues earlier within the development lifecycle, increasing your chances of passing certification the first time and speeding up the time-to-market.

Testing, Audit, and Certification

These core services are your gateway to market. GLI is approved by regulators in hundreds of jurisdictions worldwide and is trusted by them to ensure your product is compliant with their technical standards. By choosing GLI to test your product and audit your gaming operations, you can be assured that your business remains compliant in whatever market you wish to enter.

Full Lifecycle Compliance

Maintenance.
Protection.
Assurance.

Periodic Retesting, Audit and Certification

Many gaming regulators require licensees and suppliers to undergo periodic recertification of their products and/ or annual auditing of their operations. We are approved by regulators worldwide to carry out this necessary work.

Compliance Deadline Management and Preparation

We understand how meeting the deadlines for ongoing compliance obligations can be difficult. That's why GLI has implemented processes that help you. By proactively reaching out to our clients who have previously tested with GLI, we aim to increase your chances of passing periodic retests and audits the first time and on time.

Regulation and Technical Standard Monitoring

Regulations and Technical Standards are subject to changes depending on many factors such as political change or legislative reviews of the current regulations. GLI constantly strives to keep abreast of these changes. Keeping you up to date with how these changes affect you helps keep you compliant.

Training Solutions

Our people understand that every customer, product and jurisdiction is different. We can provide training solutions tailored to you, cutting through a mass of information, and presenting what you need to know.

Compliance is an ongoing journey, and we want to help you reduce costs and increase efficiency. That's why we maintain a relationship with you so that you can stay on top of your regulatory requirements wherever you are in the process.
