AUDITS & CERTIFICATIONS

Whether you need to meet security standards or demonstrate proper data governance for audits, it's essential that you protect the confidentiality, integrity and availability of your assets. We offer services to help you save money and remain in compliance. Solutions include but are not limited to:

Source Code Security Audit
Identify potential security vulnerabilities in the source code of an application. This review process is an integral part of a comprehensive application security program.

ISO/IEC 27001
Providing third-party audit and certification of your information security processes against the ISO 27001 standard. Assist in developing a new—or enhancing an existing—information security program/framework to align with the ISO 27001 standard with the goal of achieving the ISO 27001 certification.

Payment Card Industry [PCI:DSS]
Our PCI-Qualified Security Assessors [QSAs] assist organizations with all PCI requirements—from the completion of a self-assessment questionnaire or a report on compliance to conducting a gap assessment against the current PCI:DSS standard.
