

Executive Summary of Changes for “GLI-12 V3.0, Standards for Progressive Jackpots” Public Comment Draft, Issued September 12, 2025

Below is an Executive Summary of the proposed changes in “GLI-12 V3.0, Standards for Progressive Jackpots” public comment draft:

- Re-titled document. Reorganized and restructured document into more consumable chapters and sections, providing better distinction among the major technical areas of Progressive Jackpots, External Progressive Controllers, and Multi-Site Jackpot Systems.
- Added Glossary of Key Terms.
- Incorporated requirements based upon industry best practices.
- Added various content to Progressive Jackpot Requirements based on alignment with other GLI Standards and current best practices.
- Incorporated limited alignment with widely-accepted jurisdictional and international standards.
- Reorganized to provide better clarity of the requirements for progressives and when they apply (standalone versus linked, internal progressives versus external progressives).
- Generalized applicability of technical standard beyond gaming devices such that this standard applies to progressives used in operations for other forms of gaming such as bingo, table games, etc.
- Multi-Site Progressive Jackpots (WAPs) has been reorganized to provide better clarity between technical requirements, which can be evaluated in the lab, and operational controls and procedures, which can be evaluated on-site.
- Added various notes to improve clarity of requirements, and to better document known conditions or restrictions.
- Made various grammatical changes throughout the document to improve clarity and readability.
